Re: Discontinuation of fluorotreated molded fiber products

Dear Valued Distributor Partner:

Greenleaf Molded Fiber will discontinue all fluorotreated molded fiber products on November 30, 2025, as our customers move to PFAS-free packaging. Our PFAS-free replacement line is available now at the prices in the enclosed schedule.

Because the discontinued products cannot be resold into our channels, we are unable to accept returns of fluorotreated inventory held by distributors, and no return credits will be issued.

Sincerely,

/s/ Victor Sandoval
