Desk Drop · Friday scorecard

As of Fri 2026-11-20. Gate 0 is Fri 2026-11-13 (derived, founder to confirm). Counts are distinct offices or brands, by call_date.

Measure	Fri wk 1	Fri wk 2	Gate 0	As of	Target	How it is counted
Cut-off date	*2026-10-30*	*2026-11-06*	*2026-11-13*	*2026-11-20*		
Offices (Gate 0: at least 5 of 15 say yes in principle AND name a pantry owner AND a receiving window)						
Office conversations held	**3**	**7**	**13**	**14**	15	*Distinct row_ids in Office_Log with a call_date on or before the cut-off.*
Yes in principle, pantry owner named, receiving window named	**1**	**3**	**6**	**7**	5	*The Gate 0 count. One per office, from its first qualifying conversation.*
Gate 0, office side	**not yet**	**not yet**	**PASS**	**PASS**		*PASS once the count reaches the target. Before Gate 0 a shortfall reads 'not yet'; on or after Gate 0 it reads FAIL.*
Yes in principle, any (owner or window may be missing)	**2**	**4**	**8**	**9**		*Offices that said Y at least once. The gap to the row above is follow-up work: get the owner and the window.*
Said maybe at least once (someone else must agree)	**0**	**1**	**2**	**2**		*Plan Phase 1: 'I need to ask facilities and HR' is a maybe, not a yes.*
Median budget-probe answer, USD a month	**$50**	**$50**	**$75**	**$75**		*First numeric answer per office; a range counts at its low end; 'no budget' counts as 0; no number is left out.*
Offices that gave a number (0 included)	**2**	**5**	**8**	**8**		*The n behind the median.*
Of those, said no budget (0)	**1**	**2**	**3**	**3**		*Counted inside the median.*
Offices naming $100 a month or more (decision-rule input), as of				**4**		*Plan decision rule: office-paid tier is tested if at least five offices named $100 a month or more.*
Median monthly pantry spend today, USD, as of				**$850**	n=8	*First number per office, from Q1. Context for the budget probe.*
Brands (Gate 0: at least 3 of 15 say they would pay $500 or more AND the speaker controls the budget)						
Brand conversations held	**3**	**7**	**13**	**15**	15	*Distinct row_ids in Brand_Log with a call_date on or before the cut-off.*
Would pay $500 or more and controls the budget	**2**	**3**	**6**	**7**	3	*The Gate 0 count: the higher of the before and after numbers is $500 or more, and controls_budget = Y. Same rule as the financial model.*
Gate 0, brand side	**not yet**	**PASS**	**PASS**	**PASS**		*PASS once the count reaches the target. Before Gate 0 a shortfall reads 'not yet'; on or after Gate 0 it reads FAIL.*
Strict read: named $500 or more BEFORE hearing $1,500, and controls t	**1**	**2**	**5**	**6**		*Shown so an anchored answer is not mistaken for an unprompted one.*
Said $500 or more but the speaker does not control the budget	**0**	**1**	**1**	**1**		*Not counted for Gate 0 from that conversation. Ask for a call with the budget owner.*
Median brand number before $1,500 was mentioned, USD per campaig	**$375**	**$400**	**$500**	**$500**		*First numeric before-answer per brand; 'nothing' counts as 0; no number is left out.*
Brands that named a number before $1,500	**2**	**6**	**11**	**13**		*The n behind the median.*
Median brand number after hearing $1,500, USD per campaign	**$600**	**$700**	**$800**	**$850**		*First numeric after-answer per brand.*
Brands that answered after hearing $1,500	**3**	**6**	**7**	**8**		*The n behind the median.*
Median quarterly sampling budget, USD (low end), as of				**$2,000**	n=15	*From Q2. Context: a $600 or $1,500 campaign against what they spend now.*

Gate 0 overall

Gate 0 result	**not yet**	**not yet**	**PASS**	**PASS**	
Sentence for the Gate 0 decision (as of)	As of 2026-11-20: 7 of 14 offices said yes with a pantry owner and a receiving window (target 5); 7 of 15 brands would pay $500 or more and control the budget (target 3). Gate 0: PASS.				
If it fails (plan)	*Fewer than 3 brands: test the office-paid version for three more weeks. Fewer than 5 offices: change the cluster or the office size band, not the model.*				

Top three objections per side, as of (mentions across objection_1 to objection_3)

Office	Mentions	First quote logged for that code
Office side		
1. I need to ask facilities, HR or someone else (needs_approval)	**5**	SAMPLE: needs_approval (office 04) SAMPLE: allergy_policy (office 01)
2. Allergy or food-safety worry (allergy_policy)	**5**	
3. We already have a pantry vendor or contract (existing_vendor)	**2**	SAMPLE: existing_vendor / allergy_policy (office 02)
Brand side		
1. $600 / the price is more than we pay per sample elsewhere (price_p	**4**	SAMPLE: price_per_sample / what_we_get (brand 01)
2. We can seed offices ourselves for free (seed_ourselves)	**3**	SAMPLE: seed_ourselves / price_per_sample (brand 03)
3. What do we actually get out of it? (what_we_get)	**3**	SAMPLE: what_we_get (brand 04)

Pace and reply rate (from the Friday Clay paste)

Measure	Fri wk 1	Fri wk 2	Gate 0	As of	How it is counted
Office first touches sent	**12**	**23**	**33**	**39**	*Clay rows with touch_1_date on or before the cut-off.*
Office replies (any human reply, opt-outs included)	**4**	**13**	**19**	**23**	*Rows with last_reply_date on or before the cut-off; bounces and auto-replies excluded.*
Office reply rate	**33%**	**57%**	**58%**	**59%**	*Replies / first touches. The plan needs 20%.*
Office positive replies	**4**	**10**	**15**	**17**	*reply_type yes, maybe, needs_approval, send_info or referral.*
Office conversations per first touch	**25%**	**30%**	**39%**	**36%**	*Conversations (above) / first touches. 15 from about 75 first touches is 20%.*
Office opt-outs	**0**	**0**	**1**	**1**	*Rows with opt_out_date on or before the cut-off. Every one must have do_not_contact = Y.*
Office reply-rate check (as of)	**OK: at or above 20%.**				
Brand first touches sent	**12**	**22**	**34**	**40**	*Clay rows with touch_1_date on or before the cut-off.*
Brand replies (any human reply, opt-outs included)	**4**	**12**	**18**	**24**	*Rows with last_reply_date on or before the cut-off; bounces and auto-replies excluded.*
Brand reply rate	**33%**	**55%**	**53%**	**60%**	*Replies / first touches. The plan needs 20%.*
Brand positive replies	**4**	**9**	**14**	**18**	*reply_type yes, maybe, needs_approval, send_info or referral.*
Brand conversations per first touch	**25%**	**32%**	**38%**	**38%**	*Conversations (above) / first touches. 15 from about 75 first touches is 20%.*
Brand opt-outs	**0**	**0**	**1**	**1**	*Rows with opt_out_date on or before the cut-off. Every one must have do_not_contact = Y.*
Brand reply-rate check (as of)	**OK: at or above 20%.**				
Email bounces to date (offices + brands) / first touches to date				**5.1%**	*Stop cold email from the domain and check the list if this passes 2% (sending guide section 6).*

By sequence variant and by channel, as of (pick winners only on large gaps; see sending guide 6.4)

Sequence or channel	Side	First touches	Replies	Reply rate	Positive replies
office-discovery-A	office	20	8	40%	7
office-discovery-B	office	19	15	79%	10
office-selling-A	office	0	0		0
office-selling-B	office	0	0		0
brand-discovery-A	brand	20	9	45%	8
brand-discovery-B	brand	20	15	75%	10
brand-selling-A	brand	0	0		0
brand-selling-B	brand	0	0		0
office-conversion-A	office	0	0		0
brand-conversion-A	brand	0	0		0
channel: email	office	25	11	44%	8
channel: email	brand	28	15	54%	12

channel: warm-intro	office	2	2	100%	2
channel: warm-intro	brand	0	0		0
channel: walk-in	office	3	3	100%	3
channel: walk-in	brand	0	0		0

Sequence names come from Clay's sequence column. Edit the names in column A to match the variants Part A's copy uses.

Data checks (fix every FIX before reading the numbers above)

Check	Count	Result	What to do
Office_Log rows with a sync issue	3	FIX	*Read calc_sync_issue on Office_Log; fix in Clay, then re-paste.*
Brand_Log rows with a sync issue	1	FIX	*Read calc_sync_issue on Brand_Log.*
Clay office rows with an issue	2	FIX	*Sync tab, office list.*
Clay brand rows with an issue	1	FIX	*Sync tab, brand list.*
Handoff rows whose Clay status is not signed / paid	0	OK	*Set the Clay status to signed or paid.*
Clay columns missing from a paste	0	OK	*Export all columns from Clay (CONTRACTS 6.2 names).*
Days since the Clay offices paste (as of)	0	OK	*Paste a fresh export each Friday and type its date on Config.*
Days since the Clay brands paste (as of)	0	OK	*Same.*
Offices that said Y but owner or window is missing	2	info	*They do not count for Gate 0 until both are named.*
Budget probe asked but no verbatim	0	OK	*Type the answer word for word.*
Brand number given but no verbatim	0	OK	*Type the answer word for word.*
Log rows with a row_id but no real call_date	0	OK	*Type the date as YYYY-MM-DD.*
Clay touch_1_date cells stored as text	0	OK	*Reformat the column as a date in Clay or here, or they drop out of every count.*
Pipeline events beyond the export rows	0	OK	*Raise EXPORT_N in tools/build_tracker.py and rebuild, or split the file.*
Notes over the ten-minute target (as of)	5	info	*If this grows, trim the note template, not the verbatims.*
Median minutes per note (as of)	9	info	*Target 10 or less.*
SAMPLE rows in this file	113	SAMPLE	*Delete them before real use, or keep include_sample = N so they are ignored.*
